

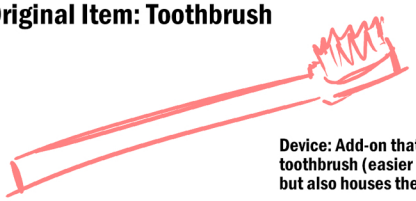
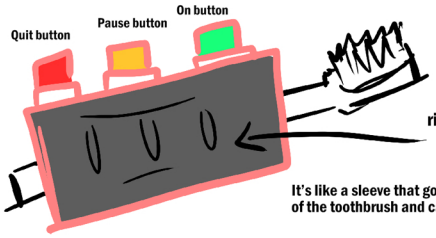
Original Item: Toothbrush



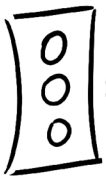
Device: Add-on that adds a grip onto the toothbrush (easier for elderly to hold onto) but also houses the electronics.



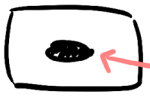
ridged grip

It's like a sleeve that goes over top of the toothbrush and can be gripped

Inside:
- **potentiometers to be able to sense orientation of the brush**
- **sound cue for mistakes**
- **vibration for mistakes**
- **VIVE tracker**



concave grip, comfy



hole for tooth brush to go through
